Philosophy of Technology

Christian education is committed to providing a complete education for God's people. The goal of Christian education is to help children know Jesus Christ as their Savior, to grow in their faith, and to develop their talents to be used in this life to bring glory to God.

The development and use of modern technology continues to change and shape our lives. In order to gain proficiency in this technological age, computer education at our school begins in first grade. Students are given the opportunity to develop keyboard familiarity, gather, organize, and display data, learn basic terminology, and work with educational software that supplements other areas of the curriculum.

Students are scheduled for training in the school's computer lab on a weekly basis. Students are also given opportunity to use the computer lab for word-processing and when integrating technology into class assignments.
